

MAGNETOCARDIOGRAPHY

A NEW GOLD STANDARD IN CARDIAC DIAGNOSTICS

NEW RADIATION-FREE, NON-INVASIVE SYSTEM

CONTINUOUS VISUALIZATION OF **HEART** FUNCTION

IN EKG TYPE SIGNALS AND COLOR MAPS

Discharge as 'normal'

Suspect 'Coronary Artery Disease'

MAGNETOCARDIOGRAPHY (MCG) - MCG is based upon the collection of hundreds of Bioelectromagnetic heart beats that provide visual displays and functional overviews with high accuracy of normal or dysfunctional heart conditions in 10-minute non-invasive tests. Summary results based upon sophisticated software are available to cardiologists within 3 minutes after test completion.
